The information in this document is subject to change without notice and should not be construed as a commitment by TimeLinx Software Inc. TimeLinxTM assumes no responsibility for any errors that may appear in this document. The software described in this document is furnished under a license and may be used or copied only in accordance with the terms of such a license. While making every effort to ensure the accuracy of this document, products are continually being improved.

As a result of continuous improvements, later versions of the products may vary from those described here. Under no circumstances may this document be regarded as a part of any contractual obligation to supply software, or as a definitive product description.

System Requirements

All system requirements are as of the current date (12/8/2016) and the current released version (2016.4.0) of TimeLinx for Infor CRM. TimeLinx cannot guarantee compatibility with any Infor CRM releases, services packs, web browsers or any other dependent products or technologies which are not released as of the writing of this document.

TimeLinx for Infor CRM is not currently compatible with Infor CRM remote database synchronization. Please contact TimeLinx Support if you need to run TimeLinx in an environment which must also create, and synchronize with, remote databases.

Resolution

The TimeLinx for Infor CRM screens are designed for higher resolutions. For optimum viewing, set the monitor resolution to 1680 x 1050 or higher.

Keys

Key	Description
ICRM	Meaning that TimeLinx support for a particular platform does not differ from base Infor CRM support. No special consideration is required.
+	Meaning that listed version is the lowest currently supported and all known subsequent versions, as of this release, are supported.
Y	Yes, version is supported.
N	No, version is not supported.
-	Compatibility cannot be measured. For example, examining the browser compatibility of a desktop application.
VS	Meaning that TimeLinx support for a platform does not differ from base Vineyardsoft KnowledgeSync support. No special consideration is required.
*1	TimeLinx Mobile is built on the SenchaTouch framework which requires a WebKit enabled browser.
*2	See SenchaTouch page for specifically supported Mobile hardware, http://www.sencha.com/products/touch/features/
*3	Requires SNC Update 02 for Saleslogix 8.0.
*4	Requires SNC Update 03b or Update 06 and higher for Infor CRM 8.1.
